

Dataset

The dataset contains categorical data about which political party was elected in each of the UK’s 650 constituencies, with 10 different parties winning in at least one constituency

Task

Find which party was elected in Edinburgh and London respectively. You need try it from large canvas to small canvas.

When popup appears, you can speak aloud:

What is your decision/choice?

Why did you choose it?

What confused you?

Are there something you want to do but the system doesn't offer?

How closely did your choice align with your expectation?

When you finish the task, please tell me

1. What designs do you find difficult or unsatisfactory to you in each design?
2. In terms of agency, what do you find unsatisfactory or missing features?
2. Which version do you prefer? What points of each version do you like or dislike?
